SEZIONE I

INTRODUZIONE

SEZIONE I

1. Introduzione ed istruzioni sulla consultazione del catalogo.

1.2. Questo catalogo nomenclatore illustrato descrive le parti di ricambio riguardanti il velivolo F-104S costruito dalla Ditta AERITALIA - Stab. di Torino, su licenza della Ditta LOCKHEED CALIFORNIA Co. - Burbank, Calif. - U.S.A.
Le informazioni fornite sono utilizzabili per scopi logistici e per facilitare l'identificazione delle parti necessarie per la manutenzione presso Enti utilizzatori e di manutenzione e, per le riparazioni, presso Enti e Ditte riparatrici.
Esse permettono l'identificazione, l'immagazzinamento e la distribuzione delle parti presso gli Enti logistici, nonchè le operazioni di acquisto delle parti stesse presso le Ditte produttrici da parte degli Enti responsabili degli approvvigionamenti.

1.3. La disposizione delle parti illustrate si riferisce alla loro reciproca relazione nelle fasi di smontaggio e rimontaggio dei complessivi.

1.3.1. Per ulteriori informazioni tecniche riguardanti le istruzioni operative, di manutenzione, ispezioni e riparazione dell'equipaggiamento oggetto della presente pubblicazione, il personale interessato dovrà riferirsi alle seguenti pubblicazioni della stessa serie:

AA.1F-104S-1
AA.1F-104S-2
AA.1F-104S-3

2. Lista delle parti di ricambio ed illustrazioni (Riferimento alla Sez. II).

2.1. La disposizione delle figure delle parti di ricambio è stata impostata secondo la sequenza delle operazioni di scomposizione dei subcomplessivi dei complessivi principali, fino al dettaglio delle singole parti componenti.
Ogni complessivo principale è stato illustrato con figure a se stanti, con l'elencazione delle rispettive parti di ricambio, in ordine di scomposizione. Le parti non ulteriormente scomposte o non elencate in dettaglio non sono da considerarsi normali pezzi di ricambio e, per tale motivo, non sono state illustrate anche al fine di evitare erronei approvvigionamenti. Nei pochi casi in cui sia risultato necessario illustrare ed elencare anche parti non procurabili, le stesse sono state affiancate nella colonna « Quantità » dall'annotazione « NP » che significa « non procurabile ». Altre parti, per necessità di concatenamento del testo e delle illustrazioni, sono state invece indicate con l'annotazione « REF » che sta ad indicare che esse sono state riportate solo per riferimento. La loro quantità di approvvigionamento risulta dalla figura di rimando indicata tra parentesi dopo la denominazione.

2.2. Elencazione.

L'elencazione è disposta nelle seguenti colonne:

2.2.1. Colonna « **Figura e particolare** ». Include il numero della figura e i numeri di riferimento delle parti di ricambio illustrate nella figura stessa.

2.2.2. Colonna « **Numero di Riferimento (NDR)** ». Include i numeri assegnati alle parti di ricambio dalle Ditte, da indicare nelle richieste di approvvigionamento.
Per i numeri riguardanti voci modificate, occorre assumere informazioni nella serie delle pubblicazioni tecniche/modifiche indicate in calce al testo delle figure.

2.2.3. Colonna « **Denominazione** ». Include la denominazione delle parti, nel modo più conciso, con l'aggiunta, quando sia il caso, di informazioni di intercambiabilità o di modifica e, per complessivi particolari, anche il numero della relativa pubblicazione tecnica.

2.2.4. Colonna « **Quantitativo** ». Include il numero indicante il quantitativo di ogni voce illustrata nella figura a cui si riferisce l'elencazione. Se in luogo del quantitativo è indicata la sigla « NP », tale voce non è procurabile. Se invece è indicata la sigla « REF » la quantità di tale voce va ricercata nella figura indicata tra parentesi dopo la denominazione. La sigla « AR » (a richiesta) sta ad indicare che la quantità di quell'articolo va stabilita di volta in volta, secondo le esigenze di montaggio.

2.2.5. Colonna « **Codice di applicabilità** ». Include i codici assegnati alle serie di produzione aventi diversa configurazione e differenti NDR.

2.2.6. Eventuali correzioni, variazioni od aggiunte effettuate nel testo del catalogo dopo l'edizione iniziale, sono indicate da una barretta nera verticale disposta sul bordo esterno a fianco della o delle voci interessate. I NDR, pur rimanendo inclusi nel testo, portano l'indicazione della pubblicazione che interessa la modifica.

3. Indice dei « Numeri di Riferimento (NDR) » (Riferimento alla Sez. III).

3.1. L'indice dei NDR è compilato in accordo col sistema alfa-numerico. In questo sistema la sequenza dei NDR è disposta in modo che l'ordine di precedenza dei componenti del numero sia il seguente:

— **prima posizione:** lettere da A a Z - numeri da 0 a 9;
— **seconda posizione e successive**: spazio bianco - diagonale (barra) - punto - linea - lettere da A a Z.

3.1.1. I NDR preceduti da un asterisco (*) si riferiscono a parti modificate, per le quali occorre rilevare le informazioni nel testo della Sezione II, riferendosi alla rispettiva figura.

3.2. Le varie colonne comprendono le seguenti informazioni:

3.2.1. Colonna « **N° di Riferimento (NDR)** » (come da precedente paragrafo 2.2.2.).

3.2.2. Colonna « **Figura e particolare** » (come da precedente paragrafo 2.2.1.).

3.2.3. Colonna « **N° di Codificazione (NDC)** ». Include, a titolo informativo, tutti i NDC assegnati alle parti di ricambio nella codificazione logistica militare, conosciuti dal compilatore al momento dell'edizione del Catalogo. Le voci prive di NDC non sono ancora state codificate od hanno in corso la relativa azione di codificazione.

Attenzione - Per più dettagliate e sicure informazioni ufficiali sulla validità dei NDC elencati, occorre riferirsi alle apposite pubblicazioni logistiche ufficiali.

3.2.4. Colonna « **Codice di Utilizzazione** ». Questa colonna è suddivisa in tre colonne nelle quali sono inclusi i seguenti codici, col significato a fianco indicato:

1. Da utilizzare essenzialmente presso Ente di manutenzione;
2. Da utilizzare essenzialmente presso Ente di riparazione;
3. Voce elencata solamente per esigenze descrittive, normalmente non fornibile. Non è consigliato l'approvvigionamento per l'immagazzinamento di scorte.

Le « X » inserite nelle varie colonne indicano la pertinenza delle informazioni cui si riferiscono le colonne stesse. Se la « X » è inclusa in più colonne, significa che il pezzo è utilizzabile ai vari livelli indicati.

NOTA - Secondo le direttive impartite da COSTARMAEREO:

a) le voci indicate nella colonna 1 si riferiscono essenzialmente a gruppi, complessivi e parti per i quali un Reparto d'impiego può effettuare la sostituzione senza particolari attrezzature e col personale tecnico a disposizione, oppure a gruppi, complessivi e dettagli relativi, per i quali un Ente di manutenzione può effettuare sostituzioni e piccole riparazioni con l'ausilio di particolari attrezzature di lavoro e di prova normalmente a sua disposizione e con adeguato personale tecnico specializzato.

c) le voci indicate nella colonna 2 sono quelle utilizzabili per le grandi riparazioni, con mezzi adeguati e personale specializzato, presso gli Enti di riparazione o Ditta.

3.2.5. Colonne « **Codice del Progettatore Costruttore** » e « **Codice del Riproduttore** ». Includono i numeri-codice delle seguenti Ditte costruttrici delle parti di ricambio elencate in questo catalogo, comprese le Ditte indicate al precedente paragrafo 1.2.:
